PROFESSIONAL SUMMARY

Cybersecurity student and U.S. Marine Corps veteran with three years of experience operating mission-critical systems, managing military cryptographic infrastructure, and leading teams under pressure. Skilled in Python, C, Java, and JavaScript, with hands-on experience in secure communications, cryptographic key management, and cybersecurity fundamentals. Demonstrated ability to deliver technical projects under tight constraints, with a hackathon win and active participation in competitive build events. Seeking a career in cybersecurity, applying a background in secure systems and software development to protect and defend critical infrastructure.

EDUCATION

Temple University Japan

B.S. Cybersecurity

Tokyo, Japan

Sep. 2025 – Expected 2029

- Relevant coursework: Python, C, Java, algorithms, discrete mathematics, OOP.

Lake Minneola High School

Minneola, Florida, USA

Aug. 2017 – May 2021

EXPERIENCE

United States Marine Corps

Okinawa, Japan • North Carolina, USA

Field Artillery Radar Operator

Jun. 2022 – Jun. 2025

- Operated three radar systems (AN/TPS-80, AN/TPQ-48, AN/TPQ-46) in mission-critical environments, tracking artillery munitions and delivering real-time battlefield intelligence to commanding officers.
- Led small-team deployments, calibration, and systems readiness checks for multimillion-dollar radar equipment under strict operational time constraints.
- Managed cryptographic key infrastructure as KMI Custodian, securely loading military encryption keys onto L3Harris AN/PRC-117G and AN/PRC-152 radios.
- Completed two formal military schools, earning credentials as both Combat Marksmanship Coach (CMC) and Trainer (CMT), delivering impactful hands-on marksmanship training and developing curricula that raised qualification rates across the unit.
- Awarded the Navy and Marine Corps Achievement Medal for exceptional performance in cryptographic security management and personnel marksmanship training.

PROJECTS

OpenAI x Tokyo AI Hackathon — Build with OpenAI

Hongo, Tokyo, Japan

4-Person Team

Jun. 2026

- Competed in an invite-only Build with OpenAI event, presenting a fully rebuilt FocusHear — a real-time assistive communication platform for people with hearing loss. Implemented a GPT-4o and ElevenLabs Scribe pipeline, Supabase Auth with Stripe billing, saved voice and face profiles, live sound-alert translation, and a trained ONNX-based LSTM sign-language model. Advanced to the first round against international teams.

SDGs to Startups Hackathon 2026

Shibaura Institute of Technology, Tokyo

4-Person Team

Jun. 2026

- Built FocusHear in 48 hours — a real-time assistive communication platform addressing SDG 10: Reduced Inequalities. Enabled selective listening (hear only a chosen speaker in a crowd), ASL fingerspelling via hand-position tracking, and color-coded live transcription. Powered by ElevenLabs Scribe and real-time speaker diarization.

TabeTalk

Shibuya, Tokyo, Japan

Builders Weekend 2026 Hackathon — 5-Person Team

Mar. 2026

- Engineered an AI-powered dining app that automates bill-splitting using real-time voice recognition to identify each guest's order and auto-assign costs when the check is scanned.
- Integrated APIs from VoiceOS, ElevenLabs, RevenueCat, and other sponsors to deliver voice and payment workflows within a 48-hour build window.

Freelance English Teacher Site

kadysenglish.com

Jan. 2026 – Present

- Designed and developed a business website for a freelance English teacher featuring a landing page, services section, and contact form, delivering the first real project for a client. Built with HTML, CSS, and JavaScript.

Personal Portfolio

carlmasters.com

Nov. 2025 – Present

- Built and deployed a personal portfolio site from scratch using HTML, CSS, and vanilla JavaScript, featuring animations, responsive layout, and live project showcases.

AWARDS

1st Place — SDGs to Startups Hackathon 2026

Shibaura Institute of Technology

Jun. 2026

- Earned 1st place for building FocusHear, an assistive communication platform for the hearing-impaired, recognized for innovation addressing SDG 10: Reduced Inequalities.

1st Place — UI/UX Hackathon

Temple University Japan

Mar. 2026

- Earned 1st place for redesigning a broken website into a clean, user-centered interface under a tight time constraint, outperforming competing teams.

Navy and Marine Corps Achievement Medal

United States Marine Corps

2024

- Awarded for exceptional performance in cryptographic security management and personnel marksmanship training.

SKILLS

Programming Languages

Python, C, Java, HTML, CSS, JavaScript

Tools

Git, GitHub, VS Code, Terminal / CLI

Technical

Radar Systems Operation, Cryptographic Key Management, Secure Communications

Web Development

Responsive Design, DOM Manipulation, Flexbox / Grid, Web Forms

Languages

English (Native) • Japanese (Beginner)
