PROFESSIONAL SUMMARY

Cybersecurity student and U.S. Marine Corps veteran with three years of experience operating mission-critical systems, managing military cryptographic infrastructure, and leading teams under pressure. Skilled in Python, C, Java, JavaScript, and cybersecurity fundamentals, with two hackathon placements and a first client project delivered. Actively pursuing a career in cybersecurity, applying a background in secure communications, cryptographic systems, and software development to protect and defend critical infrastructure.

EDUCATION

Temple University Japan, Tokyo — B.S. Cybersecurity

Sep. 2025 – Expected 2029

Coursework: Python, C, Java, algorithms, discrete mathematics, OOP.

Lake Minneola High School, Minneola, Florida, USA

Aug. 2017 – May 2021

EXPERIENCE

United States Marine Corps — Field Artillery Radar Operator

Jun. 2022 – Jun. 2025

Camp Hansen, Okinawa, Japan • Camp Lejeune, North Carolina, USA

- Operated three radar systems (AN/TPS-80, AN/TPQ-48, AN/TPQ-46) in mission-critical environments, tracking artillery munitions and delivering real-time battlefield intelligence to commanding officers.
- Led small-team deployments, calibration, and systems readiness checks for multimillion-dollar radar equipment under strict operational time constraints.
- Managed cryptographic key infrastructure as KMI Custodian, securely loading military encryption keys onto L3Harris AN/PRC-117G and AN/PRC-152 radios.
- Completed two formal military schools, earning credentials as both Combat Marksmanship Coach (CMC) and Trainer (CMT), delivering impactful hands-on marksmanship training and developing curricula that raised qualification rates across the unit.
- Awarded the Navy and Marine Corps Achievement Medal for exceptional performance in cryptographic security management and personnel training.

PROJECTS

TabTalk Beta — Builders Weekend 2026 Hackathon

Shibuya, Tokyo • Mar. 2026

- Engineered an AI-powered dining app with a 5-person team that automates bill-splitting using real-time voice recognition to identify each guest's order and auto-assign costs when the check is scanned.
- Integrated APIs from VoiceOS, ElevenLabs, RevenueCat, and other sponsors to deliver voice and payment workflows within a 48-hour build window.

UI/UX Hackathon — 1st Place

Temple University Japan, Tokyo • Mar. 2026

- Redesigned a non-functional website with broken UI from the ground up, resolving core functionality issues and introducing new user-facing features that improved usability and retention, earning 1st place among competing teams.

Freelance English Teacher Site

- Designed and developed a business website for a freelance English teacher featuring a landing page, services section, and contact form, delivering the first project for a paying client. Stack: HTML, CSS, JavaScript.

Personal Portfolio

- Built and deployed a personal portfolio site from scratch using HTML, CSS, and vanilla JavaScript, featuring animations, responsive layout, and live project showcases.

SKILLS

Programming Languages: Python, C, Java, HTML, CSS, JavaScript

Tools: Git, GitHub, VS Code, Terminal / CLI

Technical: Radar Systems Operation, Cryptographic Key Management, Secure Communications

Web Development: Responsive Design, DOM Manipulation, Flexbox / Grid, Web Forms
